Part 3 - Team Use of Scrum and Essence

- Briefly describe how your team has been utilizing Scrum and the Essence concepts

The scrum master asked us what we had finished every so often, when we were going to do, and what was preventing us from doing that.

- Describe any issues the team is having following these approaches

We are still having some difficulty in properly allocating jobs among the group. It is a bit difficult to know how much work to give each person and how long it will take. Though, admittedly this sprint did not have a whole lot required in it, so only a few people really had much to work on.

- Describe any methods your team has adopted to improve

As mentioned, we have slightly changed a few of the methods of Scrum (Daily standup and backlogs) to better suit our needs for this project.
